EzSpark

BETA roadmap

< 100 beta requests

Starting outreaching campaign, starting fundraising campaign, website validation, idea validation.

100 beta requests

Servers setup, 100 profiles activation, Trainings creation activation.

100 profiles feedback weeks

feedback checks, issues check, metrics check.

< 100 active profiles

More profile activations to get 100 profiles fully active. Back to <100 profiles feedback weeks>

> 100$/Mo with fundraising

Activation of 150 profiles for beta testers each 100$ monthly got from the fundraising

>100 profiles feedback weeks

feedback checks, issues check, metrics check.

Not enough active profiles

More profile activations to get the adequate number of profiles fully active. Back to >100 profiles feedback weeks

>1000 active profiles

Monetization: Freemium options, ads, Alpha.

EzSpark

TECHNICAL
ALPHA roadmap

deep learning training

release of an already succesfully tested unknown private distributed deep learning algorithm

Go, Rust libraries

Implementation of inference libraries in rust and go for ezspark

Applications

Desktop and mobile application release

Supervised algorithms

Possibility to train in supervised mode

Unsupervised algorithms

Possibility to train in unsupervised mode
